Redesigning Towards an NGSS Classroom (all grade levels)

**Monday, December 5, 2016 at LEARN, Old Lyme**
8:30am – 3:00pm

**Thursday, December 15, 2016 at EASTCONN, Hampton**
9:00am – 3:30pm

**Wednesday, February 22, 2017 at Southington Public Schools**
8:30am - 3:00pm

Don’t throw those lessons out with the bathwater! “Tried and true” lessons that have created meaningful experiences for your students for years do not need to be discarded with the advent of new standards. Join us as we share how JASON Learning is redesigning labs to support the transition to an NGSS classroom. Educators will experience two versions of a JASON lab, one created pre-NGSS, and the other a newly designed NGSS version. We will examine specific modifications and the strategies and tools used to make the adaptations through hands-on experience, discussion, and the use of the EQuIP rubric. Toward the end of the session, educators are invited to examine a “tried and true” lesson of their own and apply these new strategies and tools to make future modifications. Come prepared to share ideas and engage in this deconstruct and re-design discourse.

Intended audience: Administrators, curriculum directors, science coaches, team leaders, and science teachers. Although not required, we highly recommend that educators participate in the Next-Gen Science CT Short Course (visit ngss.ccat.us/ for details) prior to attending a JASON workshop. Other prior PD focused on NGSS, and familiarity with the EQuIP rubric is also helpful. Participants are also encouraged to attend as a team of 2 or more from the same school or district.

Open Access to JASON Programs for Public School Educators & Students in Connecticut Through 2018!

Register at www.jason.org/ct using your school email address for free access to JASON’s award-winning curriculum. JASON offers hands-on labs, digital simulations and games, articles, videos, interdisciplinary connections, and powerful classroom management tool for teachers. Explore earth science, forces & motion, energy, climate, recycling, ecology, environmental science, oceanography, weather, wetlands and more!
CSTA has a new website coming!
If you need to renew now, do so via the new site. The direct link is https://csta.wildapricot.org/Join-us
You can make your secure online payment, or download the mail-in brochure if you prefer.

Learn More About the NRCA’s Conservation Ambassador Program:
http://nrca.uconn.edu/

NRCA’s Conservation Jump-start Workshops
Beginning August 2017, faculty from UConn’s Center for Land Use Education & Research and Departments of Natural Resources & the Environment and Education will be running multiple 2-day workshops for high school students and adult learners. Workshops will introduce participants to innovative, user-friendly geospatial technology that can be utilized to study and address local conservation issues.

NRCA’s Teacher Training
Also, beginning July 2017, faculty from UConn’s Center for Land Use Education & Research and Departments of Natural Resources & the Environment and Education will be running a 3-day professional development workshop for secondary school teachers. Participants will be immersed in relevant local and regional water resource issues and online mapping tools to study these issues further. Each participant will also design 5-7 classes on a Water and Sustainability Science unit based on Next Generation Science Standards during the workshop that can be tailored to their needs.

If you are interested in learning more about these programs, I would be happy to discuss them with you further over email (laura.cisneros@uconn.edu) or by phone (860-486-4917). I am also visiting schools to give brief presentations on our programs to the students and teachers.

BERMUDA NEXT SUMMER!!
Interested in a professional development workshop this summer from June 26-July1 in Bermuda at the Bermuda Institute of Ocean Sciences? Learn the latest in data collection techniques including ocean "gliders." Also learn how to plan and implement a field study course at BIOS for your students.
Contact Ed Argenta at: Edandpat74@comcast.net or Kaitlin Baird at: kaitlin.Baird@bios.edu for more information.
Go here for the program flyer:

Science & Engineering Colloquium for Teachers
MIT Club of Hartford
March 28, 2017
MIT Professor Eric Klopfer
Director of the Scheller Teacher Education Program and the Education Arcade

- Stimulate your intellectual curiosity
- Learn new information on how games and simulations can be applied to STEM
- Continue education opportunities

“Applying Science to Your Students’ Lives”

The MIT Club of Hartford will be hosting this colloquium at the Pratt and Whitney Training Center in East Hartford. This colloquium is open to science, mathematics and technology teachers from Southern New England and is free of charge. Each teacher is encouraged to bring motivated, interested students. Space is limited to an audience of 60 teachers and students, so register today. In addition, all attendees must have registered prior to the event.

Program:
10:00 AM – Welcome by Avi Ornstein, MIT Club of Hartford.
10:15 AM – Professor Klopfer will speak on "Games and Simulations in STEM Teaching and Education".
11:00 AM – Professor Klopfer will participate in a group discussion, answering questions from the audience.
11:30 AM – Everyone will participate in a group discussion of what is going on in STEM education.
12:30 PM – Professor Klopfer will have an informal discussion with students over pizza regarding these issues that will affect their future.
12:30 PM – Teachers will also be able to have pizza and will be able to visit the Next Generation Technology Center and to participate in an entertaining tour of the Pratt aircraft engines led by a retired B52 pilot.
12:45 PM – Students will be able to participate in an entertaining tour of the Pratt aircraft engines led by a retired B52 pilot.
The MIT Club of Hartford is counting on YOUR participation. Please set aside this date. Please contact Avi Ornstein (ornstein@alum.mit.edu) if you are interested in attending or if you desire more information.

Please share this note with other teachers who might be interested.

Eric Klopfer is Professor and Director of the Scheller Teacher Education Program and The Education Arcade at MIT. Klopfer’s research focuses on the development and use of computer games and simulations for building understanding of science, technology, engineering and mathematics. The games that he works on are designed to build understanding of scientific practices and concepts as well as critical knowledge, using both mobile and web-delivered game platforms. In the realm of simulations, Klopfer’s work focuses on students understanding complex systems through critical thinking and connecting computer programming with scientific practice and real-world issues. He is the co-author of the books, "Adventures in Modeling", "The More We Know", and the upcoming “Resonant Games”, as well as author of "Augmented Learning." His lab has produced software that includes the UbiqBio line of mobile biology games, the Massively Multiplayer game, and The Radix Endeavor, as well as platforms such as StarLogo TNG for modeling complex systems, Taleblazer for creating augmented realities, and Gameblox for making games online. His work also includes a series of Massive Open Online Courses known as edTech, which cover educational technology and games. His work has been funded by federal agencies including NIH, NSF and the Department of Education, as well as the Gates Foundation, the Hewlett Foundation, and the Tata Trusts. Klopfer is also the co-founder and past President of the non-profit Learning Games Network (www.learninggamesnetwork.org). Prof. Klopfer will give an overview of ongoing MIT work and will talk a bit more about the structure and goals. Then he will discuss the use of simulations and games in K-12 education and in teacher education. He will focus on why they are doing things and where they fit.

Note:
Due to government security regulations set because of the research done at Pratt & Whitney, to be able to participate in this program, you must RSVP on or before March 20th. The information that is needed is your name, whether you are a teacher or student, the name of your school and its city, your home and email addresses and whether you are or are not a U.S. citizen. If you are not a citizen, you will have to bring your passport with you.

MoDRN (Molecular Design Research Network) from Yale, developed a number of materials for HS teachers. These hands-on classroom exercises can be used by educators to introduce the topic of safer chemical design through inquiry based learning. The topics can be easily integrated into any existing science curriculum or can be allied health – based
We encourage you to study this announcement widely with experience.

launch her into her college young woman in Connecticut to $5,000 scholarship years, t

Kraus legacy of Kaman Corp partnership between the Eileen Kraus Scholarship OF STUDENTS November of our workshop i

NSTA participants who were part sending a follow up e-mail to HS teacher network. And while none of my colleagues is available this weekend, we hope to start building relationship with HS teacher network.

Finally, our collaborators from University of Washington will be sending a follow-up e-mail to NSTA participants who were part of our workshop in early November.

FOR STUDENTS
Official announcement of the new Eileen Kraus Scholarship, a partnership between the Hall and Kaman Corporation that honors the legacy of 2002 Inductee Eileen Kraus. For each of the next five years, this program will award a $5,000 scholarship to one deserving young woman in Connecticut to launch her into her college experience. Click here for all the application details, and please share this announcement widely with students and colleagues. Application deadline for the first year is February 15, 2017.

New England Science & Sailing
New England Science & Sailing (NESS) has a wonderful scholarship opportunity available to send your students to one of our unique and curriculum enriching field trip programs this winter! NESS is able to provide free programming to those schools with a Free and Reduced lunch rate 80% or over, all you need to do is get your students to our waterfront location! If you are not familiar with NESS, we are a nationally recognized, award winning nonprofit 501(c)(3) adventure education organization based in Stonington CT. We provide students of all ages with year-round programming that includes marine science, sailing and ocean adventure sports with an exceptional combination of on-the-water and in-the-classroom lessons intended to build confidence, teamwork, and leadership. Our programs support and enhance STEM/STEAM based curriculum, utilizing an inquiry-based approach to learning, where we emphasize “hands on, minds on”. All our programs incorporate the Next Generation Science Standards (NGSS), the Ocean Literacy Principles and can be adopted to meet individual classroom needs. Feel free to visit our Educator Guide for further insight into our programs: http://www.nessf.org/schools/invitation-to-educators. In addition, you may enjoy spending 2 minutes to watch our school program video: http://www.nessf.org/schools/invitation-to-educators. We are excited to share this opportunity with your school district this winter. Our goal is to provide your school with a program that will challenge your students and assist in developing the next generation of STEM based learners. A few of our top recommendations include: STEAM Challenges, the Augmented Reality Sandbox, NESS Tech using ROV’s (Remotely Operated Vehicles), Land Sailors, Simple Machines, and our brand new Aquaculture Investigations program.

Climate Cost Project’s 2016/2017 Witnessing Change Video Competition.
The competition gives advanced high school and college students an opportunity to document local impacts of climate change, educating themselves, their communities, and the public. In addition to the video contest, the Climate Cost Project provides interdisciplinary educational materials on the economics of climate change, including a specialized climate change economics game and 101 environmental economics chapter. You can find out more about the competition, and our work and mission, in the short video further below, and on our website. We hope to see some of your student’s submissions in the spring, and of course please get in touch with us if you have any additional questions. https://www.youtube.com/edit?o=U&video_id=YWaB3wbNuCQ

The Milton Fisher Scholarship wants to support students who excel as creative problem-solvers and to help make their higher education goals more accessible. We encourage you to read the short description about the scholarship below. Please forward this information along to any promising student applicants that you may know and/or to relevant staff members.

To access the online application, see answers to frequently asked questions and
read about previous winners, visit our website: www.rbffoundation.org  Applications due: April 30, 2017  We offer up to $20,000 (up to $5000 per year for four years) the scholarship is open to exceptionally Innovative and Creative High School Juniors, Seniors and College Freshmen who are:  • Graduating from a high school in Connecticut/New York City Metropolitan area (and plan to attend or are attending college anywhere in the U.S.) OR  • Graduating from a high school anywhere in the U.S. and plan to attend (or are attending) college in CT or NYC  Apply for this scholarship if you are... • a student who has solved an artistic, scientific, or technical problem in a new or unusual way, • a student who has come up with a distinctive solution to problems faced by your school, community, or family, • a student who has created a new group, organization, or institution that serves an important need. The Milton Fisher Scholarship for Innovation and Creativity is administered by the Community Foundation for Greater New Haven.

Population Education’s World of 7 Billion student video contest is back for the 2016-2017 school year. Would you consider helping us spread the word to Connecticut environmental educators? The contest is open to all high school and middle school students and the deadline for submissions is February 23th, 2017. We’re hoping that by giving teachers enough lead time, they’ll be able to incorporate the contest into their syllabi. Participating teachers can receive free curriculum resources and the student winners receive cash prizes.

This year’s challenge: Students will create a short video (up to 60 seconds) about human population growth that highlights one of the following global challenges:

• Climate Change
• Ocean Health
• Rapid Urbanization

*All videos must include a) how population growth impacts the issue, and b) at least one idea for a sustainable solution. We are happy to send copies of our contest flyer for you to share

FOR TEACHERS!

PALEONTOLOGICAL RESEARCH INSTITUTION ANNOUNCES PUBLISHING OF SERIES OF TEACHER-FRIENDLY GUIDES™ The Paleontological Research Institution (PRI) has published a national series of seven Teacher-Friendly Guides™ covering regional Earth Science of the United States. The Guides cover the geological history and processes behind real-world examples to help students make sense of the distribution of landforms, rocks and soils, mineral and energy resources, fossils, Earth hazards, and climate. The seven regions, covering all 50 states, represent the Northeastern, Southeastern, Midwestern, South Central, North Central, Southwestern, and Western US.

The Guides were developed to help teachers incorporate local and regional examples into their Earth Science curricula. “We found that there has been a need for the Guides because nationally-distributed textbooks often make few references to the local area around any given school,” said Rob Ross, PRI Associate Director for Outreach and one of the founders of the series. “And we found that while a number of good resources exist for individual states, the Teacher-Friendly Guides take geographic scope into account to explain larger scale Earth processes, with teachers and secondary students in mind.”

Eighteen years in the making, the Guides began with a grant from the Arthur Vining Davis Foundations in 1999 for a Teacher-Friendly Guide to the Geology of the Northeastern US. The project was further supported by two grants from the National Science Foundation (0455833 and 0733303), to develop the Guides and a pedagogical approach, virtual fieldwork experiences (VFEs), by which students incorporate regional “virtual” fieldwork throughout the school year. Each Guide has a chapter on real and virtual field work and on using real-world regional Earth Science in the context of the Next Generation Science Standards. PRI offers teacher professional workshops on use of the Guides and developing and implementing virtual fieldwork experiences. An informal unveiling of the series will take place at the Geological Society of America’s 2016 Annual Meeting in Denver, CO on September 26th at their Friends of PRI Reception.
Subject: $1000 Scholarships for Amazon Rainforest PD Workshop in Peru

Scholarships are available for K-16 science and environmental educators for the July 1-11, 2017 Educator Academy in the Amazon Rainforest of Peru. Application deadline is Feb. 1st, 2017.

Join Al Stenstrup, former Director of Education for Project Learning Tree; Dr. Nancy Trautmann, Cornell Lab of Ornithology; Dr. David Pearson, Wildlife Travellers’ Guide to Peru; along with scientists Dr. Steve Madigosky, Widener University; and Randy Morgan, Curator/Entomologist, Cincinnati Zoo as you:

- Participate in citizen science projects and inquiry based field studies on a 1/4-mile Rainforest Canopy Walkway in one of the most biologically diverse environments on the planet.
- Spend a day in an Amazon village and experience the role of education in creating a sustainable future for Amazon children.
- Explore sustainability, conservation, and field work with indigenous communities in the Amazon
- Work with fellow educators to develop strategies for using the Amazon as a vehicle for incorporating STEM education, inquiry-based learning, and sustainability science education into your NGSS classroom.

Project Learning Tree and BirdSleuth resources plus 50 Arizona State University PD hours included. Academic credit and Machu Picchu extension optional. Get the details and download a syllabus and scholarship application at: http://www.amazonworkshops.com/educator-academy.html
Contact christa@amazonworkshops.com or 1-800-431-2624 for more information.

NSTA Launches new Safety Blog!

With a new school year starting soon, science, technology, engineering, and math (STEM) students will be participating in hands-on activities and demonstrations, which means that safety must be addressed. For a safer and more memorable learning and teaching experience, check out the new NSTA Safety Blog: http://nstacommunities.org/blog/category/safety

Why use the Blog?

- To share up-to-date information on legal safety standards and better professional practices for a safer working and learning environment and a safer STEM instructional experience;
- To disseminate current information on safety incidents occurring in K–12 classrooms, labs, and maker spaces;
- To provide support and initiate dialogue in efforts to answer safety-related questions from bloggers, either teaching or supervising in K–12 classrooms, labs, and maker spaces.

Anyone can subscribe for free! Just go to the blog address above and scroll down to the bottom of the page. Follow instructions for a complimentary subscription!

- Connecticut Green LEAF Schools has been awarded a Teacher Quality Partnership Grant through the CT Office of Higher Education. More information about Connecticut Green LEAF Schools can be found at www.ctgreenleaf.org

Travel the world affordably, earn professional development credit, and bring global understanding into your classroom! Founded in 2007, Global Exploration for Educators Organization (GEEO) is a 501c3 non-profit organization that has sent over 1600 teachers abroad on adventurous travel programs. With GEEO educators can earn professional development credits and optional graduate credit while seeing the world. GEEO’s trips are 7 to 21 days in length and are designed and discounted to be interesting and affordable for teachers. In addition to amazing tour leaders, many of the programs are accompanied by university faculty that are experts on the destination. The deposit is $250 for each program and then the final payment is due 60 days before departure. GEEO also provides teachers educational materials and the structure to help them bring their experiences into the classroom. The trips are open to all nationalities of K-12 and university educators, administrators, retired educators, as well as educators’ guests. GEEO is offering the following travel programs for 2016: Bali/Lombok, Bangkok to Hanoi, China, Costa Rica, Eastern Europe, The Galapagos Islands, Greece, Iceland, India/Nepal, Bhutan, Ireland, Armenia/Georgia, Italy, Multi-Stan, Antarctica, Morocco, Myanmar (Burma), Peruvian Amazon, Peruvian Andes, Southern Africa, Vietnam/Cambodia, Balkans and, a Mt. Kilimanjaro climb. The registration deadline is June 1st, but space is limited and many programs will be full well before the deadline. 
Teach Earth is built upon the principle that every individual can contribute to a sustainable planet, regardless of scientific background or skill. Each year, we select talented teachers from all subject areas to work side by side with world-class scientists on field research expeditions around the world. From the edge of the Arctic to the coast of Maine, these teachers collect data on climate change, ecology, wildlife, and more. Teachers have the opportunity to learn the scientific process first hand and help to solve some of the world’s most pressing environmental challenges. Teachers return to the classroom with new perspectives and knowledge, invigorated and inspired to share the experience of real discovery with their students. Interested in learning more? Click on http://earthwatch.org/education/teacher-fellowships/teach-earth-united-states

NGSS K-8 Evidence Statements Now Available The NGSS Evidence Statements for elementary grades (K-5) and middle grades (6-8) are now available. These statements were developed and reviewed by educators and scientists, including many members of the NGSS writing team. The evidence statements are intended to identify clear, measurable components that, if met, fully satisfy each performance expectation (PE) described within the NGSS. Given that each PE is three-dimensional, the statements describe how students can use the practices, crosscutting concepts, and disciplinary core ideas together to demonstrate proficiency on the PEs by the end of instruction. They are not meant to limit or dictate instruction and were written to allow for multiple methods and contexts of performance, including students' performance on multiple related PEs together at the same time.

For more information, see the Introduction and Overview, which applies to the evidence statements for all grade levels. Additional materials, including appendices for K-2, 3-5, and middle school are coming soon.

For more information, see the Introduction and Overview, which applies to the evidence statements for all grade levels. Additional materials, including appendices for K-2, 3-5, and middle school are coming soon.

What Is Science Matters? Science Matters is an initiative by the National Science Teachers Association (NSTA) to bring content, news, and information that supports quality science education to parents and teachers nationwide. Science Matters builds on the success of the Building a Presence for Science program, first launched in 1997 as an e-networking initiative to assist teachers of science with professional development opportunities. Building a Presence for Science—now Science Matters—reaches readers in 34 states and the District of Columbia. Why does Science Matter? Science is critical to understanding the world around us. Most Americans feel that they received a good education and that their children will as well. Unfortunately, not many are aware that international tests show that American students are simply not performing well in science when compared to students in other countries. Many students (and their parents!) believe that science is irrelevant to their lives. Innovation leads to new products and processes that sustain our economy, and this innovation depends on a solid knowledge base in science, math, and engineering. All jobs of the future will require a basic understanding of math and science. The most recent ten year employment projections by the U.S. Labor Department show that of the 20 fastest growing occupations projected for 2014, 15 of them require significant mathematics or science preparation to successfully compete for a job. This is why Science Matters. Quality learning experiences in the sciences—starting at an early age—are critical to science literacy and our future workforce. Feel free to publish this information in school newsletters and bulletins, and share it with other parents, teachers, and administrators.
